*Setting a new standard in patient satisfaction.*

LASIK eye surgery has brought new freedom to people worldwide. Now there's a remarkable new system of personalized laser vision correction that far surpasses conventional LASIK technology. Its three guiding principles set it apart from anything else:

*Clarity. Commitment. Confidence.*

# C *Unsurpassed* CLARITY

*The sharp, clear vision you've been waiting for.*

**Not just better vision.  
A better quality of life.**

The Bausch & Lomb Zyoptix™ personalized laser vision correction system can do more than improve your vision, it can enhance your life. You'll be able to play sports with greater ease. Enjoy social and athletic activities with greater confidence. All thanks to your Zyoptix procedure.

**The Bausch & Lomb Zyoptix system  
is an extraordinary technology.**

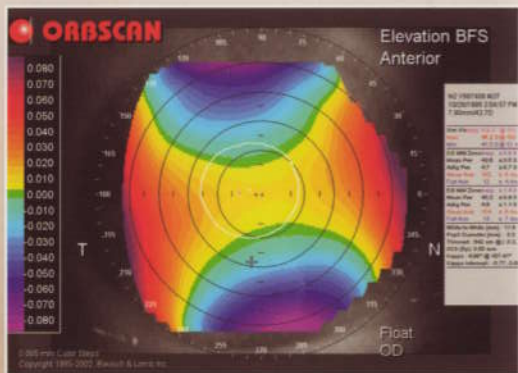

The Bausch & Lomb Zyoptix system provides the most comprehensive analysis of the eye so that your eye doctor can plan a personalized laser vision correction procedure completely individualized to you. It even has the ability to correct eye imperfections that could not be treated with conventional LASIK techniques.

# C *Unparalleled* COMMITMENT

## How the Zyoptix™ system works.

Your eye doctor receives data from the unique Zyoptix integrated diagnostic system. One set of data evaluates the structure of your cornea, the second measures your eye's anatomy for unique optical characteristics. Simply explained, the Zyoptix system maps up to 9,600 data points, giving your eye doctor a precise three-dimensional picture of your eye's shape and characteristics.

The Zyoptix system gives you the sharp, crisp vision you've been waiting for.

The Zyoptix system maps and analyzes thousands of data points to create a personalized laser vision correction plan expressly for each eye.

*A new standard in personalized laser vision correction through the collaboration of Bausch & Lomb and the world's most forward-thinking eye doctors.*

## From the most forward-thinking eye doctors in the field.

The fact that your eye doctor is using the Bausch & Lomb Zyoptix system means that he or she is at the forefront of personalized laser vision correction and committed to using the most advanced technology available.

## From the world leader in eye health.

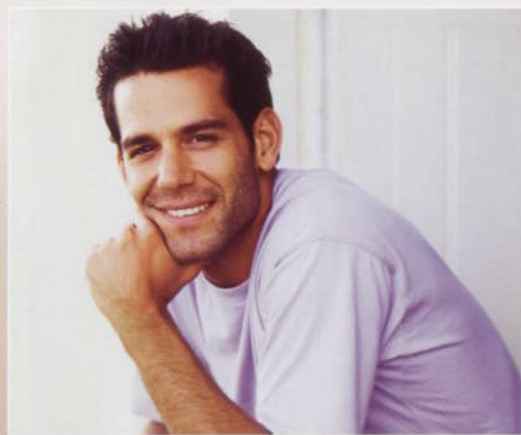

From the introduction of the first soft contact lens to innovations in surgical eye care to the latest advances in ocular pharmaceuticals for 150 years, Bausch & Lomb has been dedicated to perfecting the quality of vision for people around the world.

In the hands of your skilled eye care professional, the Zyoptix system's integrated diagnostics provide the most personalized laser vision correction ever available.

# C *Unequaled* ONFIDENCE

*The assurance of knowing that your eye doctor uses the state-of-the-art Zyoptix™ system and that in the U.S. clinical trial not a single Zyoptix patient was dissatisfied with the results.*

## A new level of patient satisfaction.

In the U.S. clinical trial not one patient reported any dissatisfaction.

## Over 100,000 procedures...

The Bausch & Lomb Zyoptix system has been used by eye doctors worldwide in over 100,000 procedures. The U.S. clinical trial showed that six months after surgery, the vast majority of patients treated with the Zyoptix system achieved or reported the following:

- "Extreme" improvement in quality of vision.
- Vision better than 20/20 without glasses.
- Vision without glasses after surgery as good as, or even better than, with glasses before surgery.
- No increase in unwanted glare, halos or night driving difficulty.
- High satisfaction with their results.
- They would choose the procedure again.

With a track record like this, it's no wonder your eye doctor feels confident choosing this remarkable system.

# FAQ

## How will I know if I am a good candidate for the Zyoptix personalized laser vision correction system?

You may be a good candidate if you:

- Have had stable vision for the past year.
- Have healthy eyes, good general health and are not taking medication that affects the healing process.
- Are age 21 or over.
- Feel glasses/contact lenses are a nuisance.

Please note that only your eye doctor can determine if you are a suitable candidate for the Zyoptix procedure based on appropriate diagnostic tests and medical history.

## Does the procedure hurt?

No. The Zyoptix procedure is designed to be virtually painless with minimum discomfort. The actual laser procedure itself can be performed in a matter of minutes.

## How quickly will my eyes recover?

You should be able to see better 1–2 hours after the treatment, but you'll notice the dramatic difference when you wake up the next day. Most people get back to their normal routine quickly — even going back to work the next day. You may need to avoid contact sports and swimming for 2–3 weeks. Your eye doctor will advise you what is suitable for your individual needs.

## What kind of vision impairment will the Zyoptix procedure correct?

Most people who are myopic (nearsighted) can be helped by the Bausch & Lomb Zyoptix system. The Zyoptix procedure can even correct astigmatism.

## Will I ever require glasses after my Zyoptix procedure?

Some people find that there are individual pursuits where they are more comfortable wearing glasses even after their successful Zyoptix procedure. Patients who suffer from presbyopia (mostly people aged 40–50) will still require reading glasses to distinguish small, close-up objects after their procedure.
